

## Questions for Bid #21-01

Is there a bid bond for this bid? On page 2 it states 5% and on page 14 #32 it states not applicable to this project.

**There is no bid bond for this project. Thank you.**

How will the City determine/verify after the cleaning that the contractor removed 80% of the sand & grit debris from each tank that has 10% sand & grit debris by volume?

**City personnel will observe contractor's measurements of material before and after cleaning. These observations, along with consultation with the contractor, will be used to determine if 80% was removed.**

The headworks will be a separate line item correct? Will this be a lump sum cleaning price plus transportation & disposal price per ton unit based?

**The headworks is to be submitted as an alternate that may or may not be cleaned at the Owner's discretion. The price is to be lump sum for the cleaning. Unit prices are to be provided for transportation and disposal per ton removed.**

The bid price for the cleaning of the 2 oxidation ditches will be a lump sum cleaning price (includes mobilization price), plus the transportation & disposal price per ton unit based, correct?

**Cleaning of the two oxidation ditches is to be a lump sum price. Unit prices are to be provided for transportation and disposal per ton removed. Mobilization/demobilization to the project site is to be a separate lump sum line item.**

Up to the contractor to determine the amount of sand & grit debris to be removed, correct? This does not include the amount of sludge or rags in the 2 oxidation ditches, correct?

**City personnel will observe contractor's measurements of material before and after cleaning. These observations, along with observations and consultations with the contractor, will be used to determine if 80% was removed. This does not include sludge or rags in the ditches.**
